Humboldt State Normal School’s first entering class, 1914
Nearly 1,000 students, staff and faculty members gathered at the University Events Field on Aug. 30 to form a Human 100, marking HSU’s centennial year.
THE NEW SEMESTER is well underway at Humboldt State. Students have returned, and the campus is gratefully loud and energized once again.

Of course, this Fall is a special one, as Humboldt State has begun celebrating its Centennial Year. It is an important milestone. Humboldt State reaching the century mark is a reminder of California’s long and important commitment to our young people, in the form of public higher education.

Like many others, I have been reflecting often about the people and events that have shaped Humboldt State.

One of the most important elements has been the role that students have played in defining our mission as a university educating both students and our community in social and environmental responsibility. You probably played a role during your time at Humboldt.

Certainly much has changed since our days as a teacher training school. We have many more students, with different expectations. We have adjusted and responded to historical forces and to society’s needs. Today, we are a comprehensive training school. We have many more students, with different expectations. We have adjusted and responded to historical forces and to society’s needs. Today, we are a comprehensive university with diverse academic offerings, a campus that matches student mentors with incoming freshmen.

Students are applying to this remarkable institution, and enrolling, in record numbers. They need us to push them to their success are at the heart of Humboldt State’s agenda. Academic excellence to provide even more assistance. These are just a few of the latest expressions of Humboldt’s focus on the student experience.

Students are committed to changing students’ lives for the better, a place that puts students and their learning ahead of all other concerns. This was true in our earliest years, and it’s a value that has been passed down. It’s a common theme when alumni and current students share their campus experiences.

Today, we are building on that foundation. Students and their success are at the heart of Humboldt State’s agenda as we begin our next century.

We know there is an increasingly strong link between a college education and economic well-being. If a student drops out, that impact is felt for a lifetime. So our challenge is to innovate and evolve, to make sure that even more of our students have a positive experience and are able to graduate. As large and festive as our graduation ceremonies are each spring, we want them to be bigger.

Many new efforts are under way, including a program that matches student mentors with incoming freshmen. We also have a new system in place that alerts faculty and advisors when students are struggling, so they can intervene earlier. We are bringing together student support programs to make them more effective, and creating new Centers of Academic Excellence to provide even more assistance. These experiences.

In closing out the official events, HSU claimed that the City Council of the City of Arcata hereby recognizes Humboldt State University’s Centennial and commends the University for fostering both academic achievement and community service. The City Council also encourages the community and the many friends of HSU to participate in the yearlong Centennial Celebration.

Humboldt Folk Life Society provided a full day of music and Ramone’s Bakery and café handed out thousands of birthday cookies to partygoers.

Plaza Birthday Party Kicks Off Yearlong Centennial Celebration

Humboldt State University’s 100th Birthday Festival brought thousands of guests to the Arcata Plaza to help start the yearlong Centennial Celebration.

Hosted by the Arcata Chamber of Commerce, Arcata Main Street and the City of Arcata, the event took place two days before the start of the fall semester.

The Humboldt Folk Life Society provided a full day of music and Ramone’s Bakery and café handed out thousands of birthday cookies to partygoers.

Arcata Chamber of Commerce Executive Director Sandy Scott was master of ceremonies, leading the crowd through a rendition of “Happy Birthday.” Following that, dozens of “future Lumberjacks” got on stage to share what they hoped to be when they grow up.

In closing out the official events, HSU President Rollin Richmond, Arcata Mayor Shane Brinton, Arcata Council Members Susan Ornelas and Michael Winkler, County Supervisor Mark Lovelace and HSU Associated Students President Jacob Bloom spoke about the campus’ unique connection with the community.

Brinton, Ornelas and Winkler read from an official proclamation from the City of Arcata. It read, in part, “Whereas, Humboldt State University formally opened on April 6, 1914, and has since granted more than 55,000 degrees to students from diverse economic and ethnic backgrounds... Now, therefore, be it proclaimed that the City Council of the City of Arcata hereby recognizes Humboldt State University’s Centennial and commends the University for fostering both academic achievement and community service. The Council also encourages the community and the many friends of HSU to participate in the year-long centennial celebration.”
Hero Shrew: New Species Named for HSU Collections Manager

**IN BIOLOGY, SOME creatures are simply evolutionary oddities. Take the aardvark, for example, or the duck billed platypus—animals with distinct unusual features that make them unique in the mammal world. Add to that list a new species of hero shrew recently discovered by Humboldt State University alum Bill Stanley (’89, Biology).**

The moniker also has a double meaning. Scutisorex thorii is a tribute to Thorvald “Thor” Holmes (’80, Biology), collections manager at HSU’s Vertebrate Museum. Stanley credits Holmes and others at the museum for igniting his career. “I take care of one of the world’s largest mammal collections and I do that in large part because of Thor Holmes,” he says. “I thought it would be a fitting tribute to a mentor, a colleague and an inspiration.”

Although the two men have kept in touch throughout the years, Holmes says he was “completely flabbergasted” when he heard the news. Only one other species of hero shrew—Scutisorex somereni—is known to exist in the world. “I’m pretty sure this is the first and only species to be named after me,” he joked. “What else can I really say except thank you?”

In addition to naming the new species, Stanley and his colleagues offer a hypothesis as to why the shrew developed its strong spine in the first place.

They propose that the shrew’s super tough backbone allows it to access food in areas not accessible to other animals. Future research will involve testing that theory in a laboratory.

“Finding a new species and developing a hypothesis for the functional significance of its backbone is a double whammy,” Stanley says. “It’s going to open the door to a lot of research moving forward.”

PARENTS TAKE NOTE: Listening to heavy metal or other fringe music may not have as negative an effect on your kids as you may have thought.

HSU Psychology professor Tasha R. Howe and her students recently conducted a study comparing adults who listened to heavy metal music in the 1980s to their non-metal-loving counterparts.

“Perhaps not so surprising: metal heads engaged in riskier behavior as teens. But the silver lining? That lifestyle did not relate to them being any less successful or functional as adults,” Howe says. “Of course if the singer was cute, that was a bonus.”

For the study, Howe and her graduate school mentor at the University of California, Riverside, social psychologist Dr. Howard Freedman, put out a call on Facebook for research volunteers. They got 377 respondents—including former musicians and groupies who had liaisons with famous musicians.

Howe grouped participants into five categories—groups, professional musicians, metal enthusiasts, middle-aged non-metal listeners and a younger cohort of HSU students—and analyzed their responses to an 85-page questionnaire. Student research was funded in part from alumni gifts to the Humboldt Loyalty Fund.

The survey included questions on personality traits, traumatic childhood experiences and attachment style, as well as other variables such as past and current drug use, income, happiness and sexual partners. They also asked them to discuss their experiences in youth and adulthood.

The results showed that those who identified most closely with heavy metal culture in the ‘80s were more likely to come from stressful or chaotic homes. They also reported higher rates of child abuse, sex and drug use.

But, contrary to what one may think, the heavy metal enthusiasts were just as well-adjusted as adults as their non-metal listening peers, Howe says. “Not only were the middle-aged metal enthusiasts gainfully employed and well-educated, they also looked back fondly on their adolescence in the 1980s.” Howe says.

In fact, the study showed that their middle-aged counterparts were more likely to seek psychological counseling and report having a less happy adolescence. The current college students also exhibited higher rates of current negative behavior and attitudes.

The results highlighted two points, Howe says. “First, that adolescence is a time when most youth are searching for an identity. This was a theme that resonated with all of the groups assessed.”

But for the metal listeners, metal culture seemed to provide an important protective function. “That social support and sense of community may have even helped them through adolescence,” she says.

“Fringe style cultures can attract troubled youth who may engage in risky behaviors, but what we found is that they also serve a protective function as a source of kinship and connection for youth seeking to solidify their identity development,” says Howe. “Future studies could examine the effects of other fringe music cultures like hip-hop and emo.”
Biology Student Researches Rising Seas

FROM DECREASED PUBLIC access to the loss of natural resources, it’s well known that rising sea levels negatively affect coastal parks. But is there anything that California policy makers can do about it? Bethany Baibak (‘13, Biology) received a 2013 California Sea Grant Fellowship in February to help answer that question. From now until next spring, she’ll be working with the California Department of Parks and Recreation in Sacramento to develop strategies and policies that protect coastal parks from sea level rise and other environmental factors.

Baibak was one of 13 fellows around the state to receive the prestigious award. The state-funded program supports marine research and coastal conservation throughout California.

The fellowship will also provide her with the chance to explore science and policy. “As scientists, we submit our research for publication but we rarely see if it’s actually applied or used by the management community,” Baibak says. “Developing policies is a really important aspect of how we deal with our natural resources.”

Baibak’s interest in science policy is what drew her to work with botany professor Frank Shaugnessy at HSU. His research focuses on eelgrass, a flowering plant that is a valuable habitat and food source for marine animals in the bay. It also accounts for 45 percent of the eelgrass in California.

“I wanted to do something that was useful to the management community and I knew that working with Frank would give me the opportunity to have my research used by California Fish and Game,” she says.

Baibak’s current work with the California Department of Parks and Recreation will also have real-world applications. Policy makers will use the guidelines she develops as they decide how to best manage sea rise along California’s coast.

“It’s really difficult to predict what’s going to happen on a broad scale because sea rise level is influenced by a lot of local factors—even plate tectonics can factor in. Parks in areas where tectonics are causing the land to raise may not notice many if any changes as sea levels rise. On the other hand, parks where tectonics are causing the land to sink may see large impacts as a result of sea level rise,” Baibak explains.

“What we do know is that sea level rise and storm surges contribute to the loss of cultural and natural resources, infrastructure, and park facilities as well as decreased public access. This is a very complex issue that we have not had to deal with in recent history. It is a learning process for everyone involved.”

Bethany Baibak (‘13, Biology) pulls in traps to determine how fish utilize oyster beds in Humboldt Bay.

Natural History Museum Gets New Home

THE HUMBOLDT STATE University Natural History Museum will be getting a new home, thanks to an agreement with Redwood Capital Bank that provides ongoing resources for the museum and a new branch location in Arcata for the Bank.

Under this agreement, Redwood Capital Bank will lease from the University the Museum’s existing space, which is located at 1315 G Street in Arcata. In turn, the Museum will move across the street to the former Figureiredo’s Video building, which the Bank will give to the University.

Additionally, the bank has agreed to provide generous financial support to assist with the museum’s operations, as well as logistical assistance to build the museum’s endowment. The bank will also help promote the museum and will host exhibits in its new lobby.

“It is important to the bank and our board of directors that this partnership be a mutually beneficial collaboration for all parties involved, which includes the university, the museum, the bank and especially our local community,” said John E. Dalby, President and CEO.

“I am so proud to see this partnership become a reality,” said HSU President Rollin Richmond. “Ultimately, it means that the Museum is well-positioned to continue doing what it does so well—educate our children and our entire community about the natural environment.”

The Natural History Museum opened in 1989, and offers exhibits and programs for students, educators, and the general public to learn about the natural world. In recent years, it has increased its focus on offering programs for elementary school classes, as well as on training future science teachers. Last year, more than 60 elementary school classes took part in museum programs.

Mapping the Geography of Hate

IN MAY, GEOGRAPHY professor Monica Stephens’ “Geography of Hate” map attracted national and international media attention, from news website Mashable to German national newspaper Die Zeit. At the heart of the map was this question: Where in America do people use the most hate speech?

The answer turned out to be small towns with low diversity, according to the map of Twitter data created by Stephens and her students.

What they found is a high concentration of hate speech—like the n-word and the f-word—in isolated areas.

“It proves our hypothesis that areas with low diversity use more derogatory slurs against racial and sexual minorities,” Stephens says.

Another interesting finding? A clustering of the word “wetback”—a derogatory slur used against migrant workers—in Texas.

States east of the Mississippi also used more slurs than the western United States. But that can be attributed to greater population density and higher Twitter usage in those areas.

States east of the Mississippi also used more slurs than the western United States. But that can be attributed to greater population density and higher Twitter usage in those areas.
HSU has received a silver STARS rating in May, reaffirming its place as a top college for sustainability. The self-reporting system is administered by the Association for the Advancement of Sustainability in Education, or AASHE. “STARS was a much-needed step in assessing the university’s sustainability practices and commitment to environmental responsibility,” said HSU’s Sustainability Coordinator Tall Chief Comet. “It gives the university a great starting point from which to improve its practices.” STARS is a comprehensive self-assessment tool that awards credits in three categories: education and research, operations and planning, and administration and engagement. Institutions receive a rating of bronze, silver, gold or platinum. A STARS rating remains in effect for three years, after which point institutions may renew their assessment.

Over the next few years, HSU will take a series of steps to improve its assessment. The Office of Sustainability will work with campus departments to increase the university’s score in each of the three assessment categories. This fall, Comet and others will identify potential areas for improvement.

Once campuswide changes have been implemented, the university will renew its assessment. “I believe it’s realistically achievable for us to receive a gold rating by 2016,” Comet said. HSU is one of only six schools in the 23-campus California State University system to participate in STARS. Of the six CSU campuses, Monterey Bay is the only school to have earned a gold. Nationwide, 65 schools have earned bronze, 132 silver and 47 gold. No schools have earned platinum. For more information on STARS, visit stars.aashe.org.

HSU upholds its commitment to sustainability through several green programs and initiatives. Most recently, the university was named one of Princeton Review’s green colleges for 2013.

Geospatial Curriculum Revamped
HSU is revamping its geospatial curriculum to better prepare students for careers in the geospatial sciences—an job market growing by 35 percent a year according to the U.S. Dept. of Labor.

The changes—which take effect this fall—include the restructuring of several courses, the addition of two classes and introduction of a new B.S. degree option in Geospatial Science within the Environmental Science (ENVS) major. This new option will combine the core courses required in Environmental Science with the full suite of geospatial science courses. It will be taught within the larger context of Geospatial Science, rather than simply as a technological tool.

The overhaul is based on the U.S. Department of Labor’s 2010 Geospatial Technology Competency Model, which outlines the skills needed for a successful career in geospatial technology.

Campus News Round Up
$1M Granted for Humboldt Health Care
HUMBOLDT STATE UNIVERSITY’S student Wildlife Team captured its 25th title in the Western Regional Quiz Bowl at the University of Wyoming, Laramie, in mid-March.

With the Laramie victory, the wildlife team has won the title 25 times in 42 attempts since 1966. Fostering this regional dominance, successive HSU teams have won the national competition nine times in 12 appearances, including the past three years in a row.

The competition is sponsored by The Wildlife Society (TWS), an international nonprofit scientific and educational association founded in 1937. TWS works to foster excellence in wildlife stewardship, in particular wildlife conservation in North America.

The newest crop of Quiz Bowl winners includes students Justin Pursell, Ryan Vasquez, Felicia Aragon, Bennett Hardy, Phil Chason and John Oliver.

Among the questions the HSU team answered were, “In what year were wolves reintroduced to Yellowstone National Park?” A: 1995. “Sea otter populations in the Aleutian islands are believed to be declining because of predation by what marine mammal?” A: Killer whales or orca. “Everyone in the department is very proud of the students in the Wildlife Conclave class for working together to prepare the team for the competition,” says Wildlife lecturer Barbara Clucas.

AN INTERNATIONAL AGENCY has adopted a new technical standard led by the Schatz Energy Research Center that harmonizes national quality assurance requirements for solar-powered light-emitting diode devices (LEDs).

The new standard opens the door to market expansion for quality-assured LED devices in developing countries that are short of electricity and in need of alternative sources of lighting.

Adoption of the Schatz Lab’s standard by the International Electrotechnical Commission (IEC), announced at a Clean Energy Ministerial in New Delhi in April by U.S. Energy Secretary Steven Chu, is considered a milestone in international programs that provide inexpensive lighting to developing nations. Nearly 800 million Asians, for example, live much of the time in a state of near darkness, including some 400 million Indians.

The advantages are both economic and environmental: off-grid, solar illumination replaces costly, dirty and dangerous kerosene lamps and expensive battery-powered flashlights. A further benefit to the poor is that solar devices can be used for mobile phone charging.

HSU alumns Brendan Mordonca (‘12, Energy, Technology & Policy) talks with locals in Bangladesh about the advantages of off-grid solar lighting.

“The IEC standard will serve as a cornerstone in efforts to create an internationally harmonized quality assurance program for affordable off-grid lighting and energy systems that support commercial market delivery while also protecting consumer interests,” said Professor Anne Jacobson, director of the Schatz Lab. The Humboldt State lab was the technical leader of the team that drafted the IEC document. Now Schatz and its partners can take the next steps: Using the IEC standards to boost the Lighting Global quality assurance program for off-grid lighting and encourage others who work in the sector to adopt the IEC standards.

The Clean Energy Ministerial is a group of 23 world economic powers whose energy ministers meet annually to drive forward the clean energy sector worldwide. Under the CEM’s auspices, the U.S. and Italian governments have provided support for the development of a quality assurance framework for solar lanterns as part of the ministerial’s Global Lighting and Energy Access Partnership.

Lighting Inventory Illuminates Energy Efficiency on Campus
STUDENTS RECENTLY CONDUCTED a lighting inventory of all academic buildings on campus.

They recorded the wattage, number and type of light fixtures used in lecture halls, faculty space and academic service buildings. The worst offenders? Gist Hall and Founders Hall’s Green & Gold Room, which are both over-lit based on square footage, according to the report.

“Our hope is that it will be used as a resource for the university,” says Joselyn Gwynn (’14, Energy & Climate), one of the report’s authors.

HSU Ranks Again as a Top North American “Green College”
FOR THE FOURTH year in a row, Humboldt State University is ranked among the most environmentally responsible colleges in the U.S. and Canada by the Princeton Review, an education services company, in partnership with the U.S. Green Building Council.

Geospatial Curriculum Revamped

Then & Now

A CENTURY OF CHANGES AT HUMBOLDT STATE

LUCKY LOGGER  Adopted as the school official mascot in 1959, Lucky Logger is seen here with members of the Spurs, a service club active in the mid-century. Over the years there have been several versions of the Lucky mascot. Associated Students introduced the latest version in 2011.

IN THE CLASSROOM
The subjects and the equipment have changed, but one thing that remains constant is a Humboldt State professor’s commitment to students.
**STRIKING A POSE** In the founding days of Humboldt State, men were compelled to wear blue twill suits and women were to wear only drab colors. Things have eased up since, and students from the ’50s to today prefer casual, comfortable attire.

**RESIDENTIAL LIFE**

Living on campus is still a big part of the experience for many students. According to the 1962 freshman guidebook, HSC was set up to house 442 students and a full semester’s room and board went for $370.

**FOOTBALL** Athletics have been a part of Humboldt State’s offerings since the 1920s. When football got its start, nearly every man on campus was pressed into service for the team. The first intercollegiate match was held against Southern Oregon Normal School in 1927. Today, the team is a regular contender for the Greater Northwest Athletic Conference championship title.
The Library

Humboldt’s library has grown substantially over time. Today, the library is a haven for tech-connected students. The original Founders Hall library is now the Green & Gold Room.

Dining on Campus

In the 1940s, students dined in the cafeteria of Nelson Hall, the first permanent dorm on campus. Those seeking a cup of coffee or a soda headed to the COOP, a cooperative bookstore and soda fountain. Today, the campus has a number of eateries.

Gist Hall

Once the College Elementary School, Gist Hall now houses administrative offices, the KRFH broadcasting studios and a host of smart classrooms and lab facilities. The Gist Hall Theatre, however, still operates as it did in the 1930s.
GRADUATION The first Humboldt State Normal School graduations took place at Arcata's Minor Theatre. Later ceremonies took place in the Founders Hall courtyard. Today, Redwood Bowl hosts graduates and guests at three commencement ceremonies every spring.

ENVIRONMENTAL CARE
Caring for the environment has been a part of Humboldt State's curriculum from the very beginning. Early recruiting materials boasted of the school's connection to its rural environment, and things haven't changed much since.

MARCHING BAND Humboldt State's marching band alternated between the traditional and the quirky in its earlier years before settling on the scatter band motif in 1968. Today, without a doubt, the Marching Lumberjacks are the best marching band on the planet.
1. How many names has Humboldt State had since its origin in 1913?  
- Three  
- Four  
- Five  
- Six

2. What was the first name of the university newspaper?  
- The Stormer  
- The Foghorn  
- The Hilltopper  
- The Lumberjack

3. On May 16, 1915, 15 women graduated from Humboldt State Normal School. Where was this first commencement ceremony held?  
- Redwood Bowl  
- Van Duzer Theatre  
- The Minor Theatre  
- Founders Hall Courtyard

4. What was Nelson Hall?  
- First building to have central heating (no need for air conditioning)  
- First building to house a president  
- First co-ed residence hall  
- First facility to house a computer center

5. The HSU motto is Phos A Letheia, which means what in English?  
- Health and Happiness  
- Prosperity and Hope  
- Hope and Light  
- Light and Truth

6. In 1916, who donated 51 acres for the site of Humboldt State’s permanent campus?  
- Hiram Johnson and the Pacific Lumber Company  
- William Preston and the Union Water Company  
- L.K. Wood, founder of Arcata  
- William Carson, lumber baron

7. What type of college was Humboldt Normal School originally?  
- Forestry  
- Natural Resources  
- Teaching  
- Biology

8. Where was Alexander von Humboldt from?  
- Germany  
- Russia  
- Great Britain  
- The Netherlands

9. When did von Humboldt explore the region of Northern California that now bears his name?  
- 1797  
- 1801  
- 1813  
- Never

10. Who was not a Humboldt State president?  
- Ralph Swetman  
- John Van Duzer  
- Arthur Gist  
- Cornelius Siemens

11. Who was Humboldt State’s first president?  
- Nelson Van Märe  
- Ralph Swetman  
- Arthur Gist  
- Cornelius Siemens

12. What facility, completed in 1944, was a Public Works administration project?  
- The Minor Theatre  
- Gust Hall  
- The Sequoia Theatre  
- Arcata Grammar School

13. What was Gust Hall originally?  
- Dining facility  
- Residence hall  
- Administrative building  
- Elementary School

14. Founders Hall was designed by a Southern California architect who happened to visit the campus on a sunny day in 1912. He mistook the summer day as typical Humboldt weather and left the courtyard archways open. When were they enclosed?  
- 1913  
- 1929  
- 1941  
- 1970

15. How many courtyard archways are in Founders Hall?  
- 10  
- 27  
- 39  
- 50

16. When did Humboldt State adopt “Lumberjack” as a mascot?  
- 1914  
- 1952  
- 1936  
- 1969

17. The first catalog promised a climate that would keep students...  
- “studying in the library”  
- “mentally keen and alert”  
- “comfortably cool and attentive”  
- “sharp and awake”

18. What year did KHSU-FM, then KHSC-FM, begin broadcasting?  
- 1944  
- 1947  
- 1961  
- 1967

19. In its first year of existence (1914), where was Humboldt Normal School located?  
- The Minor Theatre  
- Gust Hall  
- The Sequoia Theatre  
- Arcata Grammar School

20. In 1922, how much did a one-month railroad commuter ticket from Eureka to Arcata (the main form of transportation at the time) cost?  
- $0.60  
- $1.45  
- $1.70  
- $3.35

21. What was not the first time to have carpooling allowed?  
- 17 years or older  
- must hold a high school diploma  
- a good moral character  
- a promising score on an aptitude test

22. What was the first fraternity on campus?  
- Chi Phi  
- Delta Sigma Phi  
- Delta Phi Epsilon  
- Tau Kappa Epsilon

23. What was the monthly cost of room and board in the 1910s?  
- $40-45  
- $30-35  
- $20-25  
- $10-15

24. Prior to the “Lumberjacks,” what did the student athletes of Humboldt State compete as?  
- Hilltoppers  
- Banana Slugs  
- Murrelets  
- Thunderbolts

25. What was the annual salary for male faculty members in 1914?  
- $3,500  
- $800  
- $1,800  
- $2,000

26. What was the annual salary for Nelson Van Märe, the first university president?  
- $2,500  
- $3,200  
- $5,000  
- $6,000

27. Humboldt State played—and lost—its first informal football game against players from where?  
- Rotary Club of Arcata  
- Call Berkeley  
- Pacific Lumber Company  
- Fortuna High School

28. Who was the university’s namesake, Alexander Von Humboldt, the “greatest scientific traveler that ever lived?”  
- Professor  
- Explorer  
- Writer  
- Philosopher

29. Before becoming HSU’s first president, Nelson Van Märe held a position as what?  
- An attorney  
- A teacher  
- An elementary school principal  
- Superintendent

30. When did Humboldt State play its first intercollegiate football game against Southern Oregon Normal School?  
- 1919  
- 1927  
- 1931  
- 1938

31. HSU established a wildlife management program—reportedly the first of its kind in California—in what year?  
- 1920  
- 1940  
- 1950  
- 1960

32. In the 1950s, a group of HSU professors formed a loose social association called what?  
- The Buffalo Heads  
- The Staters  
- The Elkhounds  
- The Wild Boars

33. Nelson Hall was named after Hans C Nelson, who was known for doing what?  
- Serving as the first university provost  
- Donating the land for campus  
- Introducing legislation that created Humboldt State  
- Securing community donations

34. Who earned the title “Mr. Humboldt” for his more than 40 years of service to the university?  
- Arthur Gist  
- Cornelius Siemens  
- Rollin Richmond  
- Charles Darwin

35. The inspiration for Lucky Logger, the school’s mascot, came from what?  
- A cartoon in Mad magazine  
- A cartoon by a student artist in the Lumberjack  
- A statue that once stood in the men’s gym  
- A humorous skit by theater students
36. Humboldt State Normal School’s establishment coincided with the Progressive Movement (circa 1890-1930), which championed universal education. Who was the period’s recognized educational theorist?

37. In what year did Founders Hall receive its iconic red tiled roof?

38. Which of the following is not an HSU varsity sports team?

39. How many majors does HSU currently offer?

40. How many students currently attend HSU?

41. More than 27 percent of HSU students come from what region?

42. Based on Lumberjack editorials and columns, which of the following issues did NOT largely concern the student body in the 1930s?

43. 1946 alum Steve Hillenburg— the creative genius behind the popular children’s cartoon SpongeBob SquarePants—majored in what?

44. Humboldt State features the only endowed chair dedicated to researching one species. What is that species?

45. In 1928, student Elta Cartwright qualified to compete in the Amsterdam Olympics in which sport?

46. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Krudges—skilled opponents, and a competitive spirit.

47. Which short story writer is one of the most famous literary figures who attended Humboldt State?

48. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Budos—experienced an unfortunate but briefly lived name change to what?

49. Brother and sister team Jeff Cresswell (’99, Fisheries Biology) and Michelle Kalberer joined forces to create which sustainable business?

50. In the early 1980s, Eddie Scher (“’81, Political Science) and Heidi Chen teamed up to create Soy Vay, which has become a national sensation. What is Soy Vay?

51. From water polo to wrestling, Humboldt State offers more than 180 clubs. Which is not a recognized club on campus?

52. HSU alum Mark Conover participated in the 1988 summer Olympic games in what event?

53. HSU’s 1983 relay team set a long-standing record in what distance?

54. In 2004, HSU staffer and alum Barb Duca finally earned a degree in Business (with a minor in Economics) after many continuous years of enrollment at HSU.

55. HSU has had quite a few fight songs over the years. Which of the following was NOT one of them?

56. In 1964, the school’s Division of Health and Physical Science laid out goals for program participants. Which was NOT one of them?

57. In 1997, students considered changing the school’s mascot from Lucky Logger to what?

58. Which of the following is not one of the North Coast’s six rivers?

59. What was Arcata called for its first 10 years?

60. Who led the first group of European settlers to Arcata?

61. Which native tribe originally inhabited the land that Humboldt State University is on?

62. What year did Arcata vote to become a Nuclear Weapons Free Zone?

63. What is the current estimated population of Humboldt County?

64. What is the current estimated population of Arcata, including students?

65. Humboldt County covers how many square miles?

66. The name ‘Arcata’ comes from the Yurok word ‘asket’ which means what?

67. The city of Arcata began offering bus service—from the post office to campus—in what year?

68. HSU’s unique geographic location also makes it one of the most earthquake prone spots in the country. How many earthquakes have caused damage since 1850?

69. Humboldt State University’s main campus covers how many acres?

70. In 1987, L.W. Schatz gave the university a generous donation of land to create a field experiment station for what?

71. In 1970, nearly 3,000 students, faculty and administrators held the biggest demonstration in Humboldt State’s history to protest what?

72. Which famous musician/band donated staging and props to the university from a 1987 European tour?

73. Which annual event—started in 1967—is the oldest student-run event of its kind?

74. One of the earliest campus signs directing people to Humboldt State College was made of which tree?

75. Who built the bleachers in Redwood Bowl under the direction of local carpenters?

76. In 1930, which championed universal education.

77. Who was the period’s recognized educational theorist?

78. In what year did Founders Hall receive its iconic red tiled roof?

79. Which of the following is not an HSU varsity sports team?

80. How many majors does HSU currently offer?

81. How many students currently attend HSU?

82. More than 27 percent of HSU students come from what region?

83. Based on Lumberjack editorials and columns, which of the following issues did NOT largely concern the student body in the 1930s?

84. 1946 alum Steve Hillenburg—the creative genius behind the popular children’s cartoon SpongeBob SquarePants—majored in what?

85. Humboldt State features the only endowed chair dedicated to researching one species. What is that species?

86. In 1928, student Elta Cartwright qualified to compete in the Amsterdam Olympics in which sport?

87. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Budos—experienced an unfortunate but briefly lived name change to what?

88. Which short story writer is one of the most famous literary figures who attended Humboldt State?

89. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Krudges—skilled opponents, and a competitive spirit.

90. Which of the following is not one of the North Coast’s six rivers?

91. What was Arcata called for its first 10 years?

92. Who led the first group of European settlers to Arcata?

93. Which native tribe originally inhabited the land that Humboldt State University is on?

94. What year did Arcata vote to become a Nuclear Weapons Free Zone?

95. What is the current estimated population of Humboldt County?

96. What is the current estimated population of Arcata, including students?

97. Humboldt County covers how many square miles?

98. The name ‘Arcata’ comes from the Yurok word ‘asket’ which means what?

99. The city of Arcata began offering bus service—from the post office to campus—in what year?

100. HSU’s unique geographic location also makes it one of the most earthquake prone spots in the country. How many earthquakes have caused damage since 1850?

101. In 1930, which championed universal education.

102. Who was the period’s recognized educational theorist?

103. In what year did Founders Hall receive its iconic red tiled roof?

104. Which of the following is not an HSU varsity sports team?

105. How many majors does HSU currently offer?

106. How many students currently attend HSU?

107. More than 27 percent of HSU students come from what region?

108. Based on Lumberjack editorials and columns, which of the following issues did NOT largely concern the student body in the 1930s?

109. 1946 alum Steve Hillenburg—the creative genius behind the popular children’s cartoon SpongeBob SquarePants—majored in what?

110. Humboldt State features the only endowed chair dedicated to researching one species. What is that species?

111. In 1928, student Elta Cartwright qualified to compete in the Amsterdam Olympics in which sport?

112. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Budos—experienced an unfortunate but briefly lived name change to what?

113. Which short story writer is one of the most famous literary figures who attended Humboldt State?

114. During the 1980s, Humboldt’s State Ultimate Frisbee team—the Krudges—skilled opponents, and a competitive spirit.

115. Which of the following is not one of the North Coast’s six rivers?

116. What was Arcata called for its first 10 years?

117. Who led the first group of European settlers to Arcata?

118. Which native tribe originally inhabited the land that Humboldt State University is on?
76. Which political office holder is...
78. Since 1963, HSU has owned a long line of ocean-going research vessels. Which of the following was NOT one of them?
79. Kerr tower in Founders Hall was opened in 1971 for what purpose?
80. Which building was destroyed by a lone tree in 1976?
82. What guards the lobby of Founders Hall?
84. HSU’s fifth president, Alistair McCrone, served in various university capacities before coming to Humboldt. By education he was a what?
86. Professor Stephen Sillett, the Kenneth L. Fisher Chair in Redwood Forest Ecology, has been featured in two recent cover stories in which national publication?
88. Students and researchers from the Schatz Energy Research Center designed and built the first solar hydrogen energy system in the United States, in which year?
90. Which publication christened Humboldt State the “Cinderella of the North” in 1970?
92. Approximately how many exterior stairs are there on campus, leading some to call HSU “Hills and Stairs University” or “Hills, Stairs and Umbrellas?”
94. In 1998, researchers at the Schatz Energy Research Center debuted what?
96. In what year did HSU become the first university in California—and the third in the nation—to ban single-use plastic water bottles from campus eateries?
98. The Humboldt Energy Independence Fund, which sponsors sustainability-related projects across campus, was founded by what group?
100. What team earned those titles?
Humboldt State originated as a home-grown Normal School for training teachers. It was conceived by Humboldt citizens who nurtured its fruition, galvanized state support and buttressed their commitment with donations of land and funding. Now, 100 years later, Humboldt State has grown into a comprehensive university that attracts students from all over California, the nation and the world.

A group of students and faculty poses in front of Humboldt State Normal School’s temporary location on Arcata’s 11th Street.
Humboldt
BY THE NUMBERS:
A Century of Change

Enrollment
1914 78
Today 8,116

When Humboldt State Normal School was signed into law in 1913, Arcata was still pretty much a frontier town. Dirt streets and wood sidewalks told a rough-hewn story. Cattle roamed more or less at will, although cows, goats and other livestock had been banned from the Plaza after a bandstand was installed in 1901. Eventually, male corals would become a thing of the past, too, but farming, gardening and ranching would always be vigorous enterprises.

There was scarcely a sign as the 20th century dawned that the former Union Town would become a thriving college community. Locals considered the tiny outpost on Arcata Bay a "busty" and "rowdy" place. It was known for its "ragged individualism," consonant with what late 19th century historians called "the American frontier culture, forged by adversity."

Frontier adversity yes, but Arcata was also a busy little center of trade and merchandising when Humboldt State Normal School opened months before World War I broke out in August 1914. E. B. r's retail emporium was known as "Humboldt's Wonder Store." It prefigured today's Mary's and Target, offering a broad array of goods.

Arcata's business precursors included the mache-sounding Buck's Saloon and Bull's Meat Market, the California Barrel Company, Deluxe Cleaners, the Jacobson Saloon (aka the Arcata Opera Hall), Augustus Jacoby's Fine Market Store and McConnahay's Humboldt Motor Stages.

The Miner Theatre, which would become the venue for the Normal School's first graduation ceremonies, opened at the end of 1914. It joined the ranks of the Pickwick Stage Company, Seely & Titlow's Dry Goods, Tilley's & Simon's Drugstore, First National Bank of Arcata (now the Tin Can Mall in use today), plus a cobbler's shop, livery stables, a telegraph office and the inevitable undertaker.

The establishment of the Normal School sailed favorably currents in American history that energized both the school's growth and Arcata's. California was a leader in the nation's Progressive Movement (1890-1930), which brought on by world war I, when President Woodrow Wilson committed troops to the conflict in the spring of 1917.

The normal school's doors opened on April 6, 1914, in the new movie theater at 10th and H streets, named after local business magnate Isaac Minor, opened in December. The city of Cleveland had installed the word's first red and green traffic lights.

By then, Henry Ford had hiked the pay of his employees to $5 an hour, twice the average minimum wage nationwide. Local business magnate Isaac Minor, opened in December.

The school's legal birth—California Gov. Hiram Johnson signed the bill—happened in September. In a newborn era of education of teachers, One of the school's impacts was immediate. Railroads rearranged their schedules so that commuters from the Eel River Valley (as far away as Scotia) could make their classes and still be "home for supper."

The school's first president, from 1914-1924, was Nelson Bleau Van Matre, who had earned his doctorate at the University of Chicago and taught in the Midwest and California for 15 years. Among the immediate problems he tackled: a shortage of housing in tiny Arcata, including his own. Van Matre leased the imposing and turret-dwelling at 10th and I streets, now the Crosswinds Restaurant.

As for students, a home-finding panel was set up to locate lodging where they could obtain room and board for $20-$27 a month. Luckily, 62 students showed up for the opening day of school.

Of necessity, Van Matre was a multi-tasker. In a born new institution so small, he had to serve at various times as academic advisor, admissions officer, financial controller and registrar. He also had to cope with the drop in enrollment brought on by World War I, when President Woodrow Wilson committed troops to the conflict in the spring of 1917.

Notwithstanding the 1914 "War to End All Wars" in Europe, a donation of 51 acres of land provided a fixed location on Preston Ridge for the Normal School's new home. Business mogul William Preston and the Union
Humboldt State Normal School became Humboldt State Teachers College and Junior College in the late 1920s, offering a four-year teacher training course. President Van Matre retired in 1924, handing the leadership to Stanford graduate Ralph Swetman, who led students and faculty on the nature hikes he loved. During his six-year term, Swetman hired the school’s first zoology instructor and appointed the first college librarian in 1925. Athletic competitions became part of campus life and Humboldt played its first intercollegiate football game, losing 33-0 to Southern Oregon Normal School. Humboldt’s Elta Cartwright became the school’s first sports star, making it all the way to the 1928 Amsterdam Olympics, following university employment coast to coast—25 percent—the cheeseburger was invented in 1934 and Parker Brothers began selling its first published in 1934, recorded the strong ties enjoyed by “town and gown.” Many alumni social activities were community ones.

Renamed Humboldt State College in 1935, the campus was authorized to offer a bachelor’s degree in Education two years later. Despite economic privation and ruinous unemployment coast to coast—25 percent—the cheeseburger was invented in 1934 and Parker Brothers began selling its immensely popular board game, Monopoly. Americans were hard up and parlor games were an inexpensive pastime. The Golden Gate Bridge opened, Superman premiered in comic books and “Snow White and the Seven Dwarfs” became the first full-length animated cartoon.

In the Depression years, a loaf of bread cost 9 cents. Milk was 14 cents a quart. Times were so tough that President Gist gave students permission to submit IOU’s for one semester to cope with rising tuition fees. On the eve of Hitler’s invasion of Poland in September 1939 and the onset of World War II, curriculum expanded and construction began on a new dormitory, Nelson Hall. There was one wing for men, one for women. However, women occupied both wings (76 bed spaces) due to the economic and military crises that plagued his first decade and a half in office.

When Gist took over in 1930, the Jazz Age and New York’s Harlem Renaissance were well advanced. Jazz Age slang included “Joe College.” Dance marathons were all the rage. Although the Jazz Age was famed for the unleashing of artistic and cultural license as well as excellence, Humboldt’s student body of the pre-World War II period was conservative. According to the campus’s official history, A View from the Hill, a controversy erupted about whether to allow classroom discussion of President Franklin Roosevelt’s unprecedented New Deal in the 1930s, which vastly enlarged federal spending and social support programs aimed at blunting the Depression. Gist’s tenure coincided with immense governmental, social and technological change, which was transforming the country. Frontier life was decidedly on the way out, as broadcasting knit the nation together. Some 80 percent of Americans owned a radio.

Industrial breakthroughs proceeded in spite of hard times: improved food refrigeration arrived on the scene, along with the development of synthetics like cellulose, nylon and plexiglass. A new manufacturing technique called polymerization bolstered gasoline production. The Great Depression set in during the 1930s and accordingly, most students remained local. The Humboldt Alumnus, first published in 1934, recorded the strong ties enjoyed by “town and gown.” Many alumni social activities were community ones.

As the 1920s advanced, Arcata business owners created the Humboldt State Teachers College Improvement Association. The group bought land for the site of a college elementary school, today’s Gist Hall. The association also supplied band uniforms, loans and research grants, scholarships, travel funds and further land donations. Gist Hall takes its name from Humboldt’s third president (1930-1950), Arthur Gist, a graduate of the University of Washington, an author and a former director of education at San Francisco State Teachers College. Under his leadership, the campus continued to grow, despite the shattering
She reproached her charges for chewing gum in public. She found freshmen especially prone to this "offensive and vulgar behavior." Just the same, Hadley took the young women to the Naval Air Station in McKinleyville to dance with wartime sailors.

There was one other irksome complaint: "Students necking on the first floor." Arcata established a wartime defense council and Humboldt State College was included in its evacuation plans, set forth in 1942. Residents feared Founders Hall might become a target of Japanese submarines and the council proposed camouflaging it with green paint. The walls remained "a bilious green" until 1948, three years after the war ended.

Also after the war, a G.I. Wives Club sprang up and the Lumberjack covered its activities. Vets who had lost part of their childhood to the war happily resorted to good-natured pranks, among them herding cows onto the second floor of Nelson Hall. It quickly became obvious that bovines ascended stairs more readily than they descended them. Another stunt was billed as "the infamous Whistling Pete caper." A handful of students carted an anatomy class cadaver to Nelson Hall and propped "Pete" against the front door of the women's dormitory. The mischief-makers rang the bell and ran. "The screams could be heard all over Arcata," according to A View from the Hill.

Parking violations were a problem as the 1940s drew on. The war generated an influx of older students who drove. Not infrequently, they were summoned from class to move their illegally parked vehicles.

Parking violations were a problem as the 1940s drew on. The war generated an influx of older students who drove. Not infrequently, they were summoned from class to move their illegally parked vehicles.

The Korean War, the infamous Sen. Joseph McCarthy and the Red Scare dominated national headlines as the 1950s unfolded. President Arthur Gist handed the reins to Cornelius Siemens, who was president for nearly a quarter century, 1950-1973. During that time, more than 30 buildings went up that are still in use today. And with good reason: postwar enrollment crept, too. The campus reached out to local schools with student slots.

As the 1960s dawned, Elvis Presley returned from military service, but before long he would be sharing the musical spotlight and his adoring teenage fans with the Beatles, the Beach Boys and Motown—the Four Tops, Marvin Gaye, Gladys Knight & the Pips, Martha and the Vandellas, Diana Ross and the Supremes and Stevie Wonder. KHSC-FM became California's first state college radio station. A generation after that, KHSU emerged.

The new Library was completed, the Science building was enlarged, the Forestry building went up and the old Library (today's Van Matre Hall) was converted into an engineering building. A new psychology and education headquarters was erected, today's Harry Griffith Hall.

Campus and community links were as close as ever. Hammond Lumber Company donated a truck to haul forestry students to and from the woods. Pacific Lumber charged the College Improvement Association just one dollar for a 20-year lease on land near Freshwater to be used by the Forestry Department.

Male residents inaugurated "Moon Nights" in Redwood Hall. Not to be outdone, the female students undertook to disrobe in front of their windows, pulling the blinds down just in the nick of time...

Members of the Secret Comb Society stuffed comb teeth into the locks of the new administration building, Siemens Hall. They also claimed to have shaved and wrestled a Volkswagen into the hallway in front of Siemens' office. The miscreants admitted who they were just before graduation, and as Dean of Students Don Karshner had suspected all along, their ranks included top student leaders.

Founders Hall, the oldest building on campus, got a facelift in 1970. The Natural Resources and Sciences Building went up in 1972 and the Forbes Physical Education Complex was completed in 1973. Throughout the late 1960s and into the 1970s, the antiwar movement engulfed colleges and universities nationwide as the Vietnam War dragged on. The Arcata campus was the scene of protest, too. At least one rally drew thousands, peacefully assembled.

But for all the disillusionment of the period, the lighter side of life had its day. Fads included mood rings, lava lamps, the Rubik's cube, smiley face stickers and pet rocks. Americans and people around the globe were glued to their television sets...
The University held its 75th anniversary observance in 1989, the same year the Lumberjacks marked 60 years of publication and the Berlin Wall fell. Anniversary events included a special Homecoming celebration, a golf tournament and an exhibit honoring the accomplishments of the school's namesake, the world-renowned 19th century scientist and explorer Alexander von Humboldt. As the 1990s unfurled, the HSU Library installed a computerized catalog system and the campus hosted "Jesus Christ Awareness Week." The Creekview Apartments were completed. Fortunately, the big earthquake that struck Humboldt County in April 1992 did little damage to the campus and that August the newly remodeled Bookstore opened.

1992 also marked the widespread adoption of the World Wide Web. Observers dubbed the '90s the electronic age. Humboldt State, like the world, adopted a new vocabulary of Internet lingo: spam, plug-ins, "the server's down!" Online was all the craze and the stock market reached an all-time high as a booming economy produced record low unemployment. Student-powered "eco-cycles" with wagons attached gathered campus recyclables. Grunge and preppie were fashion rivals, dress-down Fridays spread through the workplace and beyond, and Distance Education programs were poised to revolutionize Research Centers. President McCrone retired in 2002 to be succeeded by Rollin Richmond, who continued to transform Humboldt State’s development over the last century has been shaped by its connection with the Wiyot and other Native tribes of the North Coast. HSU created the first Native American Studies major in the California State University system. The university awards a comparatively large number of Native students and has provided support programs for them. Faculty and students conduct important scholarly work on projects related to Native culture, including efforts to preserve languages and campus facilities such as the Native Forum and the Goudi'ni Gallery honor Native traditions. A Wiyot chief described his people’s connection with Humboldt: "This is located in the territory where one was born." Golla says, "And this bond to the land is more than just symbolic; it’s an extreme faithfulness to one’s native language—or rather, to the language of the territory where one was born."

The Wiyot ancestral territory extended along the coast from near Trinidad to near Scotia, including the location of the HSU campus. According to tribal historians, contemporary Wiyot pre-contact population is estimated to be between 1,500 and 2,000. Prior to the arrival of settlers in the 1850s, the Wiyot had a large, diverse territory. The area was on coastal beaches and along the rivers, which also served as travel and trade routes, and there were also many seasonal camps. For thousands of years, the Wiyot fished for salmon, hunted for wildlife and gathered vegetation for food, medicine and basketry. They actively managed their resources, burning to create open grasslands, cultivating edible bulbs and carefully managing their hunting and fishing. The first recorded European sighting of Humboldt Bay was in the early 1800s, and sustained contact with Native tribes began following discovery of gold in 1849. This devastated the Wiyot, as the settlers began pushing them off their traditional lands. A decade later, in 1860 during the annual World Renewal Ceremony, a group of white men from Eureka brutally murdered women, children and elders from the tribe. After that, some interments of the tribes were made.

But the Wiyot persevered, even in the face of official efforts to separate them from their culture. In 2005, the tribe was able to purchase 11 acres of land near Scotia where the Wiyot Indian Island attack. Four years later, the city of Eureka returned an additional 60 acres of Indian land to the Wiyot Tribe, boosting tribal efforts to revitalize their cultural traditions. The tribe is now growing and numbers over 600.

Humboldt State’s development over the last century has been shaped by its connection with the Wiyot and other Native tribes of the North Coast. HSU created the first Native American Studies major in the California State University system. The university awards a comparatively large number of Native students and has provided support programs for them. Faculty and students conduct important scholarly work on projects related to Native culture, including efforts to preserve languages and campus facilities such as the Native Forum and the Goudi’ni Gallery honor Native traditions.
Humboldt State Traditions

Motto
The Humboldt State motto, "Phos Aletheia" (Greek for "Truth and Light"), was adopted during Humboldt State College's 50th anniversary year.

What's the Name Again?
Humboldt State has gone through six names in its journey from a Normal School to a university.

1913—Humboldt State Normal School
1921—Humboldt State Teachers College and Junior College
1927—Humboldt State Teachers College
1935—Humboldt State College
1972—California State University, Humboldt
1974—Humboldt State University

Mascots
Humboldt State athletes first competed as the Thunderbolts. In 1936, they decided to change to the Lumberjacks. Lucky Logger came on as the school mascot in 1959.

Marching Lumberjacks
Since 1940, Humboldt State marching bands have entertained crowds during sporting events and other activities. For a while, they wore traditional "Block H" uniforms. More recently, they've favored flannel and hard hats. In the mid-1960s, enrollment in the traditional marching band was dwindling. It was decided that the music faculty would no longer lead the entertainment efforts at athletic events. Then, in 1968, the Marching Lumberjacks emerged with a unique take on the college scatter band.

Student Newspapers

1924—the Foghorn is first student-run newspaper
1929—the Foghorn becomes the Rooter
1930—the Rooter becomes the Lumberjack
2013—Lumberjack honored by the Society for Professional Journalists as "Best All-Around Non-Daily Student Newspaper."

Three College Songs of Yesteryear

Alma Mater
Far above Pacific's water, with its waves of blue, Stands our noble Alma Mater, glorious to view. Chorus: Hail, all hail to Humboldt College Loud her praises sing. Hail to thee, our Alma Mater, Hail, all hail, all hail to thee. College life is swiftly passing, soon its sands are run. While we live we'll ever cherish, friendships here begun.

On, Oh Humboldt
On, oh Humboldt! On, oh Humboldt! Fight right through that line. Run the ball clear 'round your rivals. Touchdown sure this time—rah! rah! rah! On, oh Humboldt! On, oh Humboldt! Fight on for her fame. Fight, fellows, fight, fight, fight And win this game!

Sons of H.S.C.
So, it’s onward ever Humboldt State Forward to victory And here’s a cheer that all may hear For the sons of H.S.C. Fight, fight, fight men of Humboldt State Till the final score is told Fight for the valor of her forest green And the glory of her sunset gold.

Humboldt State University | humboldt.edu

Original Music Part of Centennial Celebration

PROFESSOR BRIAN POST strives to compose music that reaches people. That means it must be interesting and accessible, but not so soothing that it’s simply background noise.

“If someone says my music was ‘nice,’ that’s the kiss of death,” jokes Post, who specializes in composition, music theory and music technology. “You don’t want someone’s mind to wander to their grocery list while they’re listening to your song.”

Post, who most recently composed the score for a campus production of Shakuntala, is now composing another original piece: an arrangement for voice and piano to honor HSU’s 2013-14 centennial celebration.

“My ultimate goal is to draw listeners in, to keep them engaged and remind them what it means to be a part of the HSU community,” Post says of the composition, which will premiere next spring. “Of course if they walk away remembering the music, it is an added bonus.”

Post’s selection will be inspired by the poetry of several HSU faculty members. “I always like to incorporate multiple disciplines into my work because it provides me with more ideas to draw from,” he says.

Last semester, Post enlisted the help of English student Justin Tretten through a faculty-student research grant. In the University Library, Tretten found several books of poetry, including works by English faculty members Elma McCann (1930s), Reginald White (1947-62), Jorie Graham (1980s) and Jim Dodge (1990s).

Over the next few months, Post will scour the books for passages that resonate with him. “I might take a poem and recite the first few lines over and over, until music notes attach themselves to the words,” he says. “Or the poem might give me a harmonic expression, which I’ll later overlay with a melody. It’s an organic process.”

Post’s composition will premiere April 26 in Fulkerson Recital Hall. Assistant voice professor Elisabeth Harrington will perform the piece with accompaniment by HSU faculty musicians.

“It will be an acknowledgement of the wonderful creativity that has preceded me and that I’m now a part of,” Post says.
CELEBRATING 100 YEARS

Founders Woodcut Print Honors HSU Centennial

WHEN ART PROFESSOR Sarah Whorf first started hearing about HSU’s Centennial Celebration last year, she knew she had to get involved. So she began thinking of how she could use her printmaking skills to help commemorate the University’s first 100 years.

She decided to create an original woodcut of a recognizable Humboldt State scene. The resulting 10 5/8” x 7 1/2” piece will be used by HSU throughout the Centennial Celebration. A limited edition of no more than 100 original woodcut prints will be produced and sold, with proceeds going to the humboldt Loyalty Fund to help commemorate the University’s first 100 years.

Prof. Sarah Whorf visited a number of spots, but found herself coming back to Founders Hall. To get the full perspective, she walked all the way around the building and took photos from different angles. “The north side has a lot of really cool architecture, but I kept coming back to the west side,” she says. Finally, she decided on the most iconic view—Founders from the front, with a view of the stairs.

Whorf spent a few days refining the drawing, then carved her design into a woodblock. To create different effects, she used different carving tools and changed the angle at which she held the instruments. The areas she carved away remain white, while the un-carved areas left in relief on the block have ink rolled onto them with a brayer. The inked image on the block is then transferred to paper with pressure from a printing press to create an original woodcut print.

For inspiration, Whorf spent a day during Winter Break wandering around campus and snapping photos. “It was the Monday after finals week, everyone was gone,” says Whorf. “I wanted to create something that was unique to my skills and that reflected who I am and what I do,” says Whorf, who specializes in woodcuts. “I also wanted it to be recognizable and reflect the natural and architectural beauty of Humboldt State.”

For inspiration, Whorf spent a few days refining the drawing, then carved her design into a woodblock. To create different effects, she used different carving tools and changed the angle at which she held the instruments. The areas she carved away remain white, while the un-carved areas left in relief on the block have ink rolled onto them with a brayer. The inked image on the block is then transferred to paper with pressure from a printing press to create an original woodcut print.

When her final woodcut features Founders head-on, with its familiar rhododendron bushes and a student with a backpack making the long trek up. She says it reflects the natural beauty of the campus, its 100-year history and its future moving forward. “I tried to capture what HSU means to me,” Whorf says. “Hopefully, it will compel people to find their own inspiration.”

Original Play Brings Alexander von Humboldt’s Story to Life

HE TRAVELED AROUND the world and is considered the founder of modern geography. Charles Darwin once called him the “greatest scientific traveler who ever lived.”

Among his other claims to fame: a state university in Arcata, Calif., bearing his name. And this November, HSU students and faculty will pay homage to Prussian naturalist Alexander von Humboldt with a play commemorating his life and work.

“Von Humboldt was really the first geographer who saw the world as an organic whole,” says theater professor and HSU alum Michael Fields (’92, Theatre, Arts), who’s heading the project. “His name remains on literally thousands of things from species, to buildings and universities.”

Born in 1769, von Humboldt rose to fame when he published Kosmos, a treatise exploring his international travels and the relationship between humans and nature.

“Von Humboldt was really the first geographer who saw the world as an organic whole,” Fields says. “Our goal with the play is to bring that worldview to life.”

Fields—who is artistic director of the physical theatre school Dell’Arte—and his life and work. “This is a guy who was a rock star in his day,” says theater faculty member and HSU alum Michael Fields (’92, Theatre, Arts), who’s heading the project. “His name remains on literally thousands of things from species, to buildings and universities.”

Each week, students research aspects of von Humboldt’s life and personality, and experiment with different acting styles that might suit the play. During one such session class, they explored Commedia dell’Arte, a theatrical style that uses exaggerated masks to depict common archetypes.

Chris Joe, a sophomore double majoring in Music and Theatre, said it wasn’t hard to get into character once he donned the pantalone—a mask with a long, hooked nose and miserly demeanor. “Once I put the mask on, people were expecting me to act a certain way,” he says. “It was interesting to play into the audiences’ expectations.”

The play will be in the Van Duzer Theatre, Nov 7-17. It will also be featured at the 7th International and Interdisciplinary Alexander Von Humboldt Conference in Santiago, Chile Jan. 5-10, 2014.

Own a Piece of Humboldt State History

This original signed woodcut print is available for purchase through Humboldt Alumni. Just 100 were made. Visit alumni.humboldt.edu to purchase.

Proceeds support the student experience through the Humboldt Loyalty Fund.

Humboldt magazine | Fall 2013
Every year, HSU recognizes the outstanding achievements of a select group of alumni, students, faculty and staff.

2012-13 Distinguished Alumni Award Recipients

CLIFFORD ALLENBY (59, Economics, Psychology) A high-ranking state appointee across eight California administrations, Allenby has also been a community activist for more than 20 years. In 2011, Allenby was named acting director of the California Department of Mental Health. In 2012, the American Society of Public Administrators honored Allenby for his career. Allenby and his late wife Sandy were both graduates of Eureka High School and high school sweethearts who were married for 50 years.

RICK ROSENTHAL (67, Zoology) A multiple Emmy and BAFTA award winning cinematographer, Rick Rosenthal has worked with the BBC/Natural History Unit in Bristol, England since 1984. This was a launching pad for many worldwide assignments that included Pinetum Earth and Life. His latest Emmy (2011) was for the National Geographic television series Great Migrations. Rosenthal’s most recent film work is an integral part of two television specials. Superfine and his upcoming film project, entitled The Dark Side of the Ocean, is scheduled for production this year.

ELLIE CACHETTE (’06, Political Science) Cachette is the first recipient of the Recent Distinguished Alumni Award. Cachette is founder and CEO of Consiliare, LLC, a San Francisco-based company that helps businesses and customers track and manage product recalls online. She is an advocate of Women 2.0, a Silicon Valley organization for female entrepreneurs. She has been recognized by the California State Senate as an “Outstanding Educator” in AIDS and public health.

ROBERT HENRY (’67, Social Science) Robert Henry was twice elected student body president, served as president of Tau Kappa Epsilon social fraternity and was honored as Humboldt State’s Man of the Year in 1967. He formed School and College of Legal Services in 1984, which has proven to represent more than 200 educational entities. In 2006, the Sonoma County Bar Association honored Henry with its Career of Distinction Award.

Distinguished Faculty Awards

Outstanding Scholar SING CHEW Sociology Sing Chew was honored for the diversity of his research and his scholarship in environmental degradation and ecological crisis. He joined Humboldt State in 1990 and developed a theoretical model of recurring dark ages, which he has applied to periods of socioeconomic change worldwide. Chew’s research has yielded seven books, 18 journal articles and book chapters and four encyclopedia entries, among others. The Faculty Awards Committee lauded him as “a very productive scientist and an excellent teacher.”

Outstanding Professor MARK COLWELL Wildlife Mark Colwell was honored for “supercilious teaching, mentoring, scholarship and creative activities” since arriving at Humboldt State in 1989. The University Senate’s Faculty Awards Committee said his near-quarter century of service “has had a lasting effect at HSU through his excellence in teaching and sustained scholarly activities.” Highly praised by students for sharing his passion for science and ecology, Colwell also received plaudits for his research in shorebird ecology, with an emphasis on conservation and management. He is the author of a critically-acclaimed book on the subject.

Outstanding Student Awards

EMANUEL DELGADO Geography Major Emanuel Delgado is a member of the Geography Intern Program of National Geographic Global Media. Delgado won first prize at the 75th Association of Pacific Coast Geographers Meeting. His poster, “Wetlands Loss of the Mad River Slough, 1870-2001,” topped undergraduate and graduate students from 11 western states. Delgado also is an Aztec dance instructor with the university’s MultiCultural Center and a Coastal Clean-up Intern.

GABRIELA GARCIA Politics Major Gabriela Garcia, a Political Science major with an emphasis in globalization, is a Social Justice Summit Coordinator with the MultiCultural Center. Garcia is a volunteer with Nuestra Feria Salud Eureka, serving as a translator for the Spanish-speaking community and assisting with health issues affecting the Latino/Latina community. She is also the recipient of the 2012-2013 Al Egan Award for Student Activism.

MASHA E. MELNIK, Biology and Psychology Double Major Masha E. Melnik is completing dual degrees, a B.S. in Cellular/Molecular Biology and a B.A. in Psychology, plus a minor in Chemistry. Last fall, Melnik was a supplemental instruction leader for the genetics course of Professor Mark Wilson, assisting 17 students. Melnik was named a Presidential Scholar 2009 to 2012 and is a member of the Western Psychological Association and Psi Chi, the International Honor Society in Psychology.

Outstanding Professor MARK COLWELL Wildlife Mark Colwell was honored for “supercilious teaching, mentoring, scholarship and creative activities” since arriving at Humboldt State in 1989. The University Senate’s Faculty Awards Committee said his near-quarter century of service “has had a lasting effect at HSU through his excellence in teaching and sustained scholarly activities.” Highly praised by students for sharing his passion for science and ecology, Colwell also received plaudits for his research in shorebird ecology, with an emphasis on conservation and management. Terria Smith Finding Her Voice Through Journalism

FOR TERRIA SMITH (’08, Journalism), journalism is more than just storytelling—it’s about helping people find their voice.

Smith is a multimedia producer and editor for FNX: First Nations Experience, a Southern California-based television station that covers issues affecting indigenous people and Native Americans.

“I get to travel around the country and report on the struggles and successes Native Americans are experiencing as a community,” says Smith, who is a member of the Torres Martinez Desert Cahuilla Indians. “It’s the best job you could ask for.”

Smith, who grew up on the Torres Martinez Indian reservation, got her first taste of journalism at age 20, when she wrote a letter to the editor of a local newspaper discussing a land acquisition settlement facing her tribe.

“As a young person on a reservation, I didn’t really feel like I had a voice up until that point,” Smith recalls. “After the letter got published, I realized, ‘Hey, people are listening—writing is how I can get people to pay attention.”

Smith studied journalism at HSU, where she also found support through the Indian Tribal Education and Personnel Program (ITEPP). The hands-on experience she gained working for KHSU, KRFH and The Lumberjack helped her gain acceptance to UC Berkeley’s Graduate School of Journalism.

In the past few years, Smith’s work as a journalist has taken her around the country. She has featured the achievements of national advocacy organizations like the Native American Rights Fund and covered problems like Native American homelessness and economic sustainability.

“What she’s found is that within every story of hardship, there is also a story of hope.”

“If nothing else, I want to be an example for my community that they can transcend any circumstances and realize their dreams,” she says. “We all experience difficulty, but the important thing is to keep going and to not let those circumstances define you.”

1960s

SANFORD WILBUR, 1963 Wildlife, published a new book, New Feet from Tip to Tip: The California Condor Through History, the first in-depth look at the history of this species since the 1940s. It’s the culmination of some 45 years of field, lab and library research on the condors. In the mid-1970s, Wilbur and W. Dean Carrier (another ’63 Humboldt Wildlife grad) were the impetus behind the current condor captive breeding program that is finally beginning to show real success.

LOUIS D’ARIA, 1969 Broadcasting and 1971 Theater Arts and Teaching Credential, has more than 40 years of experience in commercial broadcast journalism, the majority of which was in San Francisco (KBLX, ABC). During his professional life, he won seven Emmys for photography, editing, lighting and producing. He has also won first place in the National Press Photographers feature category and first place at the New York Film Festival for best documentary, in addition to numerous other national and regional awards.

RICHARD CALDWELL, 1969 Music, was in the Navy Band Program for 20 years after graduating from Humboldt State. Since retiring in 1991 Caldwell has been a Band Instrument Repair Technician. Caldwell says he owes his career in instrument repair to a repair class he took at Humboldt the summer of 1969.

1970s

STEVE BRUDNEY, 1970 Philosophy, grew up in Lafayette, Calif., and loved hiking, camping, backpacking and applied to Humboldt State College in ’65. Brudney arrived in a foggy summer of 1969. He had a wonderful career in the theatrical world. Thanks to this department he has made a successful living at “pretending and make believe.” Sabelli recently retired from the department of theatre and dance at George Washington University where he held the rank of University Professor Emeritus; having served as chair, TD, and senior designer. Sabelli has designed in professional, academic and military venues and career highlights include: former chair of the United States Institute for Theatre Technology. Chesapeake region published intro to theatre texts and served on numerous editorial boards.

JAMES QUIGLI, 1973 Art, is a retired mechanical designer now authoring mystery novels and publishing with Amazon.

SCOTT KRUSE, 1974 Natural Resources, is building a passive solar home in the Coloma region of the American River watershed architect David Wright. They use SIPs, geothermal, photovoltaics and other innovative tools.

STEVE LA HOOOD, 1974 Theatre Arts, is part of the 2013 America’s Cup in San Francisco. La Hood supervised the final installation of the New Zealand pavilion. His company, Store Inc., designed the gateway experience for visitors to the Emirates/New Zealand center on Pier 32. La Hood says his time at Humboldt gave him the head start he needed to launch several businesses in New Zealand. He currently works all over Oceania and South Asia, enjoying a creative and productive life.

CHRISTINA PALENO ERIKSEN, 1978 Art, is enjoying an awarding career in graphic design with a successful national company—all while living in Humboldt County. It doesn’t get any better.

1980s

VAUGHN HUTCHINS, 1981 Natural Resource Planning and Interpretation, exhibited his First East Coast solo show of photography at Gallery
Tim Charters
Helping Plot Our Energy Future

DURING THE 2012 presidential election, Tim Charters (“’93, Political Science) had a chance to work with the Romney campaign. The presidential hopeful was preparing for a town hall style debate against President Barack Obama and Charters got the chance to work as an advisor on energy policy.

“I wrote a few free-flowing lines for him, which he ended up using,” recalls Charters, who is policy director for the House Committee on Natural Resources and Republican staff director for the Subcommittee on Energy and Mineral Resources. “It was very cool to see my work immediately influence the national debate.”

Charters’ political career began at HSU, where he was a member of the Campus Republicans. “We used to joke that we could meet in a phone booth,” he recalls. “We might have been lonely, but we were a committed bunch.”

In 1990, Charters volunteered for the congressional campaign of Frank Riggs. The Republican insurgent narrowly defeated Democratic incumbent Doug Bisco in a race for California’s first district seat. “The pace of it all and the rush of seeing the results come in was exciting,” Charters recalls.

Eventually, Charters moved to Washington, D.C., where he worked for several California representatives and served as legislative director for Rep. Stefan Pearce (New Mexico). He also briefly ran his own lobbying firm before joining the House Committee on Natural Resources in 2008.

As the committee’s policy director, Charters oversees legislation on American energy production, mineral lands and mining, fisheries and wildlife, public lands, oceans, Native Americans, irrigation and reclamation. “We develop policies that are pursued by Congress, and in doing so, influence where we’re heading nationally,” he explains.

One of the most rewarding parts of his job, he says, is working on energy security. “Wind, solar, hydropower, clean coal, American oil and natural gas. All of these energy opportunities come together on my desk at Congress,” he says. “It’s an amazing time to be a part of the debate on how America secures its energy for the future.”

1401 at the University of the Arts, in Philadelphia. During, and after, earning his degree at HSU, Vaughn worked for the Mendocino National Forest’s Covelo Ranger District for 12 seasons as a fish-counter, trail builder, wilderness ranger, mule packer, fire lookout and assisted with other assorted duties. Writers were spent planting trees, doing land-restoration work, and volunteering as a dunk tank assistant at HSU. In 1991, Vaughn switched careers and continued to work for HSU as the land technician for the Department of Art. His show consists of black and white images taken in the area and spent two seasons at Yosemite National Park. The exhibit at the University of the Arts came about as the result of the Morris Graves Museum exhibit of students of Tom Knight, founder of the photography program at HSU.

There, Vaughn reconnected with Harris Fogel, who graduated with a Bachelor of Arts from HSU before earning a Master of Arts at New York University. Fogel is an Associate Professor of photography and director of Gallery 1401 at the University of the Arts. Vaughn is a member of the Arcata Artisans Cooperative, which operates a gallery on the Arcata Plaza, and examples of his carbon and platinum prints can be seen there, as well as at the Arsal Adams Gallery in Yosemite Valley.

David Honeywell
1982 Forestry, 1986 Computer Information Systems, and his wife have finally retired from the federal government, 28 and a half years for Honeywell and over 20 for his wife. During a business trip, he happened to buy a winning Powerball ticket. Honeywell and his wife accepted the winning check for $271 million on Valentine’s Day this year. Soon after, they retired and are enjoying retirement and home and enjoying life. The couple has donated $4 million to charitable organizations such as Habitat for Humanity, Food Bank and many others, as well as the goal of also establishing an HSU scholarship in the very near future.

David Lemmer
1983 Business Administration, and his wife, HSU alum Amy Lemmer, fell in love during their time at Humboldt State and will be celebrating their 29th anniversary in May.

Kevin Nadin
1985 Forestry and Wildlife Resources, has been with Sierra Pacific Industries for the past 15 years, currently in the position of network administrator. After leaving HSU, Nadin began working in various forestry positions before returning to school at Chico State. He has been married for 18 years and has three children.

Bruce Parker
1986 Geology, has been hired as a staff surveyor for Marveland Consulting’s Reno, Nev., office.

Eugene “Charles” Justus
1989 Wildlife, was recently promoted to regional conservation officer with Idaho Fish and Game. One of his ancestors has been a conservation officer since 1900, soon after graduating from HSU. He manages the 22 conservation officers in the Southwest Region of IDFG. HSU’s wildlife program prepared Justus very well for a career in Idaho, where he excels in bird and “trap” conservation. Justus is married to Sue Epstein (“89, Wildlife) and has two boys. The family loves fishing, hunting and camping in the wilds of Idaho.

1990s

Jessica (Wegman) Mclaughlin
1990 English, is married and living in Sunnyvale, Calif. She has two daughters and teaches high school English at her alma mater. She loves working with the amazing kids in the area and spends her free time at her daughter’s sports and dance activities.

Leah Manos
1992 Geography, is teaching geography at Wright State University in Dayton, Ohio, and is a faculty advisor for its Gamma Theta Upsilon (geography honor society) chapter.

Hector DeLeon
1993 Liberal Studies Elementary Education, is a schoolteacher in Vista, Calif. DeLeon has a wonderful son, a gorgeous wife and misses the redwoods.

Jason Cooley
1994 Biological Sciences, is currently a chemistry professor at the University of Missouri.

Doug Downie
1994 Biological Sciences, earned his doctorate in Entomology (population genetics in grape phylloxera) at U.C. Davis. Downie spent four years doing postdoctoral research on grape phylloxera, mealybugs, and ants. He took an academic position at Rhodes University in South Africa in 2003, where he stayed to 2017. Downie now works at the Dept. of Pesticide Regulation in Sacramento. Along the way he has published poetry and prose and self-published five books of fiction.

2000s

Jordan Schugar
2000 English, was awarded the Distinguished Educator Award by Apple, Inc. Schugar received the recognition for being one of the nation’s most notable and innovative teachers. The annual ADE award recognizes teachers in all areas of academia who have creatively integrated technology into their teaching. Schugar is one of 90 U.S. educators selected this year for this prestigious award. Currently, Schugar is an instructor at West Chester University in West Chester, Pa., and teaches courses in the English and the Professional and Secondary Education departments. He specializes in teaching writing, composition, literacy and educational technology, among other education instruction areas. Schugar has written extensively about his research on literacy, reading comprehension, and mobile and digital technologies for students in elementary through post-secondary education. He has presented his findings regarding Higher Education and Technology to national education organizations including the Society for Information Technology and Teacher Education (SITE) Conferences and the National Council of Teachers of English (NCTE) Conferences. He earned his doctorate in Curriculum and Instruction from the University of Maryland, College Park, and is a member of the Keystone State Reading Association (KSRA), the International
Valeria Van Zanten Celebrating a Special Centennial

By Prof. Mark Larson

LONG-TIME RESIDENT VALERIA Damm (Del Ponte) Van Zanten celebrated her 100th birthday with family, friends and former students in Crescent City. She was born on Aug. 19, 1913.

A life-long resident of Del Norte and Humboldt counties, Van Zanten graduated from Humboldt State in 1934. Her 100th birthday is in the same year as HSU celebrates its centennial. She began teaching at Klamath Union School near the Klamath River. Jim Fisher, 87, of Ukiah, Calif., one of her former students there, attended the birthday celebration with his wife, Lillian. “Valeria still remembers the time I hid a snake in her desk drawer when I was in fifth grade,” said Fisher. “It’s a good thing she didn’t have me in her first year of teaching or she might not have continued.” Fisher recalled his disappointment when Van Zanten was later forced to resign her first teaching post when she hid a snake in her desk drawer when he was in fifth grade.

Valeria still remembers the time I hid a snake in her desk drawer when I was in fifth grade,” said Fisher. “It’s a good thing she didn’t have me in her first year of teaching or she might not have continued.” Fisher recalled his disappointment when Van Zanten was later forced to resign her first teaching post when she hid a snake in her desk drawer when he was in fifth grade.

Reading Association (IRA), the Association for the Advancement of Campuses in Education (AAACE), and National Council for Teachers of English (NCTE). Schugar now lives in West Chester, with his wife and two children.

NICOLE WEST, 2000 Interdisciplinary Studies, recently joined LACO Associates in Eureka as a planner/landscape designer. Prior to returning to Redwood Country, West was a planner for 3D Vision in San Francisco. West’s interest includes sustainable development, parks, trails, and environmental health. She has been assigned the role as head planner for Yurok Tribe’s Trails and Waterways Master Plan and is designing the Klamath Boulevard Gateway Project in Klamath.

BETH DOWNING CHEE, 2001 Journalism and Mass Communication, recently accepted a position as media relations manager for San Diego State University.

BRIAN HOLT, 2001 Natural Resources, received his master’s of Environmental Management from Duke University in May of 2012. He currently lives in Half Moon Bay, Calif., and works as a senior planner with the East Bay Regional Park District where he leads long-range planning efforts to protect an inter-connected network of open space and recreational lands.

ROBIN PRICE, 2002 History, recently began an overseas teaching position at the American School of Kosova this August. The American School of Kosova is located in Pristina, the capital of the Republic of Kosova. She currently teaches second grade.

BENJAMIN EBERT, 2003 International Studies, is now married, a father of two and runs a local investment and tax firm, Ebert Capital Management, in Arcata. Ebert is also on the HSU Centennial Planning Committee, is working on a patent for a quantitative investment strategy and periodically hires HSU interns.

ERICA DIAMOND, 2005 Child Development, is a teacher at an independent charter school in San Diego. She recently married fellow alum Richard Diamond (Art, 2005) who is a digital artist for Sony and they just bought their first home. Their son was born in 2001 and grew up on HSU’s campus (his favorite place was the Wildlife building and the crazy hall in the Art building) and he was also a graduate of the Child Development Lab. He is now as tall as me and is a super smart lacrosse and saxophone playing school planner. Diamond writes, “We have taken the things we learned at HSU, academically and life lessons (all three of us), to build the amazing life we are currently living. Thank you HSU!” Diamond states.

SARAH LEWERS, 2005 Journalism and Mass Communication, is currently living in Geoysville, Calif., and happily employed as a plaintiff’s-side civil litigator with the Law Offices of Peter Goldstone in Santa Rosa. While she handles a wide variety of cases, Lewers specializes in landlord-tenant work, easement disputes, and wrongful foreclosure cases.

RYAN MACEVOY McCulloUGH, 2005 Music and French, went to Colburn Conservatory in L.A. after graduating from HSU, went to University of Southern California for his master’s in Piano Performance, and was voted as Outstanding Graduate of Thornton School of Music. He has been at the Glenn Gould Conservatory at the Royal Conservatory in Toronto, and has just been accepted on full scholarship to Cornell School of Music in Ithaca, NY, to get his doctorate of Musical Arts.

REBECCA SANDLER, 2006 International Studies, (née Hyke), married the love of her life, Raubien Sandler, on June 10, at a sweet, intimate ceremony at her mother’s home on Lake Pleasant in Michigan. The lovebirds reside in Berkeley, Calif., with their incredible canine companion, Cinder. Raubien’s director of mechanical engineering at an exoskeleton company, and Beeva works as a doula.

EYVERSON CORRIGAN, 2006 Journalism and Mass Communication, moved down to Santa Cruz after graduating from HSU, where he worked at KCSO and KDNY radio, both AM news-talk stations. In 2010, Corrigan became a proud father with the birth of Emily Rosa Corrigan. In the winter of 2012 he moved to Humboldt and is currently the Account Manager at StreamGuys. StreamGuys is an Arcata-based Content Delivery Network, streaming clients’ content via live and on-demand videos and audio, podcasting, subscription systems, and protected content. Customers include KRFH, KHSU and Lost Coast Communications’ KHAM and KSLG.

ADAM GABREYEL PERETZ, 2008 Environmental Science & Management, now goes by Fabgenimo Aminson Fakyody. Following his initiation to the Ika religion in Nigeria. Fabgenimo was married in June to Oyasse Fakyody. Oyasse gave birth to their first-born son, Famanada Ojo Fakyody, on October 3rd, 2012. In January, Oyase Oluwan Temple, the home of worship Fabgenimo and Oyassy founded together, moved to Arcata. In April, Fabgenimo returned to Nigeria for the fourth time to be installed as a traditional chief of Ika, “meaning the one who holds the love of Ika”. Ika is the traditional religion of the Yoruba people.

Show Your Pride! Don’t miss the chance to order this limited-edition centennial brag pack! Order now and you'll receive:

- HSU stainless steel tumbler
- Commemorative T-shirt
- “ Lucky Logger” bobble-head figure
- Limited-edition HSU key ring
- Reusable HSU tote bag
- Plus more birthday surprises!

$35 including shipping
Order today at alumni.humboldt.edu or by dialing 707.826.3132
Calendar of Events

Humboldt State University’s Centennial Celebration lasts through May 2014. Don’t miss these highlight events! For a complete and updated list of events, visit Humboldt.edu/100.

Then & Now Art Exhibits
First Street Gallery and Reese Bullen Gallery
September through May
A series of exhibits featuring the “then and now” of the art department. The first exhibit, on campus art and art instruction from 1914 to 1966, opens Sept. 13. The series concludes with the Art Graduates Exhibition.

HSU History Exhibit
Clarke Museum, Eureka
Sept. 27 through December
An exhibit on Humboldt State’s history, including special displays on Native culture and the university’s first sports star, Elta Cartwright.

Homecoming & Family Weekend
HSU Campus
Friday, Sept. 27 and Saturday, Sept. 28
HSU’s Homecoming & Family Weekend, Centennial style. This two-day event features a throwback parade around the Arcata Plaza on Friday. On Saturday, don your Humboldt State spirit wear, join the pregame tailgate party and then watch the Jacks take on Dixie State.

Centennial Speaker Series
October through April
A New York Times best-selling author and a renowned nature photographer headline this special series. With talks by authors Paul Ehrlich, Peter Singer, Naomi Klein and Michael Eric Dyson, union organizer Arturo S. Rodriguez and photographer James Balog, Humboldt State celebrates Big Ideas during the Centennial Year.

Von Humboldt Play
Van Duzer Theatre
Nov. 7-9 and 14-17
An original production by HSU students and faculty, in conjunction with Dell’Arte, about the famous Prussian naturalist and explorer.

The Humboldt Bay Brass Band’s Centennial Celebratory Concert
Fulkerson Recital Hall
Saturday, Nov. 9, 8 p.m.
Works from each decade of the past century, including the well-known and famous; local compositions; pop music, film scores and more. It will also include HSU historic brass instruments from each decade.

An Education in Mathematics

Susie Baker arrived with her family in Blue Lake, from Nebraska, in the summer of 1912. That fall, Baker would return to the University of Nebraska to complete her senior year and earn a degree in mathematics. By 1914, she’d returned to Humboldt and enrolled in the new normal school.

A Well Rounded Program

Baker’s coursework likely would have included agriculture, horticulture, general science and nature study. Other courses included elementary manual training or handwork (pre-curors of vocational training), cooking and sewing.

A Historical Perspective

Baker graduated Susie Baker Fountain in 1915 (she married Eugene Francis Fountain of Arcata in February that year), and became one of Humboldt County’s most revered historians, painstakingly document- ing the lives and events of early Humboldt County. Her work appeared regularly in the Arcata Union and the Blue Lake Advocate.

Leaving an Important Legacy

Baker’s important historical work was recognized in 1967 when she was the first recipient of the President’s Distinguished Service Award, presented by Humboldt State President Cornelius Siemens. Baker served as president of the Humboldt Historical Society, vice-president of the Clarke Museum board of directors, was recognized by the Huntington Library and was a privileged member of the California Historical Society. Baker eventually moved to Berkeley, Calif., to be closer to her family, but before doing so, she donated her entire collection of papers, notes, photographs, maps and more to the University Library.
We are Coming to You, America!

DON’T MISS YOUR CHANCE TO BE A PART OF THE FUN!
The Roadshows are bringing the Humboldt State Centennial Celebration to you.
